

## Pioneering Stage 3 Assessment

### I know what equipment I need for making various pioneering gadgets

The Scout will explain how to choose a suitable project with the skills of the Patrol in mind and the key steps necessary to enable it to be built safely. Preparation and planning skills. Preparing an equipment list. Listing the main pioneering elements in a structure.

### I know how to treat basic cuts and scratches

Scouts need to talk themselves through the process of treatment. This demonstration/talk can be done in a practical way on a volunteer.

How to clean the wound

How to reassure the casualty

How to apply a bandage

### I know about the safety precautions that are needed when pioneering

The Scout should know how a structure is built and discuss possible danger points and what to do to avoid accidents during an activity. The use of hard hats. How a heavy load might be lifted. How to use guy ropes for security. Discuss how a project is constructed. Be able to identify danger points in the build process.

### I am aware of the Leave No Trace principles

Scouts should demonstrate an understanding of the key points in a practical way in a camp situation.

Dispose of waste properly

Respect farm animals and wildlife

Minimise camping impact and the effects of fire.

Be considerate of others

Travel and camp on durable surfaces

Leave what you find. Plan ahead and prepare

### I have taught other scouts how to tie some basic knots

This is best observed in actions during a pioneering activity. The Scout should be supportive and help the younger Scout become proficient at tying knots of all kinds.

### I have built at least two gadgets using ropes and poles

The Scout should have participated in the construction of at least two simple pioneering gadgets perhaps constructed on a camping adventure or as part of a pioneering activity. The Scout should be showing a progression of skill in the construction of these simple projects.
